

How to setup Azure VPN client:

Monday, October 28, 2024 2:54 PM

1. Go to the **Microsoft Store** (maybe located on the taskbar)
2. In the search bar, type **Azure VPN client** and click on **Install**

3. Once the download is done, click on **Open**

4. Click the "+" symbol to add a new VPN connection and then click on **import** (select the VPN config file provided in the chat)

5. Once the config file is import, click **connect** beside **VPN-Prod** and sign in page will appear (use your MS Azure/Entra ID account to authenticate your identity)
